soybeans by removing the majority of the soybean oil and some of the other non-protein
constituents.

c) The PDCAAS score for this product is .98. It was calculated by multiplying the lowest

This certification applies to the ingredient product as supplied by ADM and is valid 1 year
from certification. The meat/meat alternate credit for products used in CN Programs should
be calculated using the correct as-is protein value for the respective APP ingredient. If
multiple APP ingredients are used in the formulation of a CN product, then each APP
ingredient should be calculated separately to determine the oz. meat alternate provided.

This memo is to confirm that ALPHA\textsuperscript{®} DSP, manufactured by Solae, LLC, meets the requirements of Appendix A 7 CFR to Parts 210, 220, 225 and 226 for Alternate Protein Products. These requirements are:

1) This product is processed so that some portion of the non-protein constituents of the food, have been removed. This product is a safe and suitable edible product produced from a plant source.

2) The biological quality of this protein is at least 80 percent that of casein, determined by Protein Digestibility Corrected Amino Acid Score (PDCAAS). The PDCAAS ALPHA\textsuperscript{®} DSP is 0.99. Method to calculate is as follows:

1. Determine protein content.
2. Determine essential amino acid (EAA) content.
3. Determine amino acid ratios by dividing the EAA content by the reference EAA content (the reference EAA content we use is the FAO/WHO 2-5 year old amino acid pattern).
4. The lowest ratio is the uncorrected EAA score (typically 1.04 for Methionine + Cysteine).
5. Determine digestibility (97% for our soy proteins).
6. Calculate PDCAAS by multiplying uncorrected EAA score by the digestibility (1.04 x 0.97 = 1.0). Scores over 1.0 are rounded down to 1.0.

3) This product contains at least 18 percent protein by weight when fully hydrated or formulated. The maximum hydration ratio allowed for ALPHA\textsuperscript{®} DSP is 2.6 parts water to 1 part ALPHA\textsuperscript{®} DSP to achieve 18% protein by weight.

4) The protein content of ALPHA\textsuperscript{®} DSP is 65% (as-is).

Your company may make applications to FNS/USDA based on this confirmation.

Sincerely,

Lorna Von Talge
