

## Desmos Calculator for Grade 6

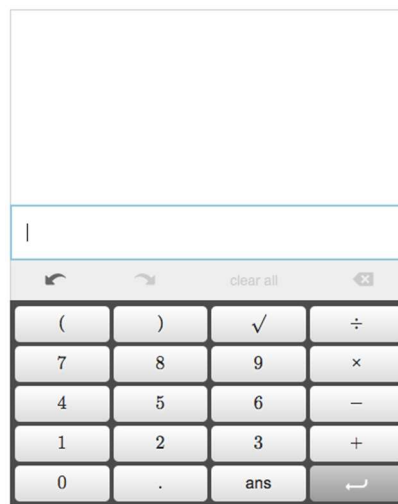

Beginning this 2017-2018 school year, the Wyoming Test of Proficiency and Progress (WY-TOPP) will use Desmos as the [online calculator](#).

### Grade 6: Four-Function Calculator

Desmos is available to use for practice at any time. The version available at [desmos.com/fourfunction](https://www.desmos.com/fourfunction) is exactly the same as that which grade 6 students will see on WY-TOPP.

### Accessibility

The four-function calculator on WY-TOPP is accessible for vision-impaired and blind students. It complies with the WCAG 2.0 standards at the AA level, and works with most assistive technologies, like screen readers. For more information, visit [www.desmos.com/accessibility](http://www.desmos.com/accessibility)

### Additional Practice for Teachers and Students

The Desmos four-function calculator is available at their [website](#). You can also download the Desmos graphing calculator at the [iOS](#) or [Android](#) app stores for free. Once downloaded, you can use these apps without an internet connection. Districts can use the graphing calculator for instruction any time before and after state testing; however, the graphing calculator will not be available on WY-TOPP for grade 6 students.

Four-function calculator tutorials are available at <http://learn.desmos.com/fourfunction> and can read the [Desmos User Guide \(English\)](#) to learn more about the Desmos calculator's functionality. The Desmos User Guide is also available in [Spanish](#) and [16 other languages](#).
