# 2014 WYOMING SOCIAL STUDIES CONTENT AND PERFORMANCE STANDARDS

## RATIONALE

The Wyoming Social Studies Content and Performance Standards represent the cooperative effort of school district, University, community college, and business participants. The State Social Studies Standards Committee recognizes that social studies is the integrated study of the social sciences and humanities to promote civic competence. The mission of social studies is to help young people develop the ability to make informed and reasoned decisions as citizens of a culturally diverse, democratic society in an interdependent world. Students develop a core of knowledge and skills drawn from many academic disciplines, learn how to analyze their own and others' opinions on important issues, and become motivated to participate in civic and community life as active, informed citizens.

In the summer of 2012, a standards review committee was convened to review the Wyoming Social Studies Content and Performance Standards. *Subcommittees were formed and it was decided that an additional social studies standard would be added to address the Framework for 21st Century Skills for technology integration and make a connection to literacy through the Common Core State Standards for Literacy in History/Social Studies, Science, & Technical Subjects.* It was also decided that an additional grade band division would be added to better meet the demand for increased rigor at all grade levels and prepare students by introducing social studies concepts at the earliest grade levels. The committee recognizes that regardless of the variations of course sequences throughout the state, the knowledge and skills identified upon graduation are intended for all students.

Please note, W.S. 21-9-102 requires all publicly funded schools in Wyoming to “give instruction in the essentials of the United States constitution and the constitution of the state of Wyoming, including the study of and devotion to American institution and ideals...” In order to receive a high school diploma, instruction must be given for at least three (3) years in kindergarten through grade eight (8) and one (1) year in the secondary grades.

The Social Studies Content Standard 1, Citizenship, Government, and Democracy, includes several benchmarks to assist in teaching both the Wyoming and United States Constitutions.

## 2018 Addition (pg. 5)

### RATIONALE

On March 10, 2017, Governor Mead signed House Bill 76, House Enrolled Act 119 into law, authorizing the creation of a committee to review the 2014 Social Studies Standards. The Social Studies Standards Review Committee (SSSRC) convened November 2017 through January 2018 to review the 2014 standards “to ensure the cultural heritage, history and contemporary contributions of American Indians are addressed”.

The SSSRC consisted of a total of 24 members including seven Northern Arapaho, five Eastern Shoshone, one Northern Cheyenne, and one Pawnee/Navajo. This committee consisted of 21 educators/administrators from 14 Wyoming school districts and the Director of the Native American Education, Research and Cultural Center at the University of Wyoming, as well as a cross-section of stakeholders from across the state.

The SSSRC recommends the attached changes to the 2014 Wyoming Social Studies Standards. These revisions and additions maintain the intent of the original benchmarks while still meeting the legislative mandate to include American Indian Education.

The SSSRC, in cooperation with the Indigenous Tribes of Wyoming, including the Eastern Shoshone and Northern Arapaho Indian tribes, took special care to preserve the intent of the legislation. Some changes were necessary and were either incorporated directly into the benchmark or added and denoted with an ‘a’ for addition (e.g., SS8.5.2a).

### INDIGENOUS TRIBES OF WYOMING: A DEFINITION

The term “Indigenous Tribes of Wyoming” was selected by the SSSRC to be a working definition inclusive of those groups who:

- Identify as indigenous, Native American, or American Indian under the regulations established by a tribe
- Maintain historical continuity with pre-colonial and/or pre-settler societies
- Maintain a strong link to territories and surrounding natural resources
- Maintain distinct social, economic, or political systems
- Maintain distinct language, culture, and beliefs
- Resolve to maintain their ancestral environments and systems as distinctive peoples and communities (e.g., Northern Arapaho, Eastern Shoshone, Northern Cheyenne, Crow, Ute, Lakota, etc.)

Adapted from the United Nations Permanent Forum on Indigenous Issues - [link to the full version from which this definition was adapted](#)

## ORGANIZATION OF STANDARDS

Standards specify the essential learning that students must master providing a K-12 framework to assist school districts, schools, and communities in developing and strengthening curriculum. *It is not intended to prescribe courses, materials, or instructional methodology.* Content and performance standards are identified for grade spans K-2, 3-5, 6-8, and 9-12 with benchmarks at grades two, five, eight, and twelve.

Teachers, parents, and students work toward the achievement of the benchmarks at the completion of each grade band level. Success at these benchmark levels requires the effort and commitment of **all** who are involved at that level.

- K-2
- 3-5
- 6-8
- 9-12

**Content Standards:** what students are expected to know and be able to do by the time they graduate

**Benchmarks:** specify the skills and content students must master in order to meet the content standards by the time they graduate

**Performance Level Descriptors:** determine student performance of the benchmarks

Descriptors help teachers assess where students are performing in relation to the benchmarks, and ultimately, the content standards.

**Advanced:** Students at the advanced level *independently* use their knowledge of social studies in complex and abstract situations and can analyze, synthesize, and communicate information and ideas.

**Proficient:** Students at the proficient level *consistently* use their knowledge of social studies in complex and abstract situations. This is the minimum level required to demonstrate mastery of the skills.

**Basic:** Students at the basic level demonstrate *partial mastery* of knowledge and skills to acquire and communicate information and ideas.

**Below Basic:** Students at the below basic level are *unwilling or do not address* the expectations of the basic level.

## 2014 Wyoming Social Studies Content and Performance Standards

### **Content Standard 1 - Citizenship, Government, and Democracy -**

Students analyze how people create and change structures of power, authority, and governance to understand the continuing evolution of governments and to demonstrate civic responsibility.

### **Content Standard 2 - Culture and Cultural Diversity -**

Students demonstrate an understanding of the contributions and impacts of human interaction and cultural diversity on societies.

### **Content Standard 3 - Production, Distribution, and Consumption -**

Students describe the influence of economic factors on societies and make decisions based on economic principles.

### **Content Standard 4 - Time, Continuity, and Change -**

Students analyze events, people, problems, and ideas within their historical contexts.

### **Content Standard 5 - People, Places, and Environments -**

Students apply their knowledge of the geographic themes (location, place, movement, region, and human/environment interactions) and skills to demonstrate an understanding of interrelationships among people, places, and environment.

### **Content Standard 6 - Technology, Literacy, and Global**

**Connections** - Students use technology and literacy skills to access, synthesize, and evaluate information to communicate and apply social studies knowledge to global situations.

All standards documents can be found on the [Wyoming Department of Education Standards webpage](#).

## CROSS-CURRICULAR CONNECTIONS

The 2018 Standards Review Committee reviewed the other 8 Wyoming content areas and added the code(s) to those other benchmarks which may be integrated with the Social Studies benchmark identified. Below is an example of some of the connections and the content area in which they can be found. ## Social Studies Content Standard 1 - Citizenship, Government, and Democracy

Students analyze how people create and change structures of power, authority, and governance to understand the continuing evolution of governments and to demonstrate civic responsibility.

### Rationale

*The vitality and continuation of a democratic republic depends upon the education and participation of informed citizens. All students should have opportunities to apply their knowledge and skills and participate in the workings of the various levels of power, authority, and governance, which should be applied to the rights and responsibilities of good citizenship.*

W.S. 21-9-102 requires all publicly funded schools in Wyoming to “give instruction in the essentials of the United States constitution and the constitution of the state of Wyoming, including the study of and devotion to American institution and ideals...” In order to receive a high school diploma, instruction must be given for at least three (3) years in kindergarten through grade eight (8) and one (1) year in the secondary grades.

## Performance Level Descriptors

### GRADE 2

**Advanced:** A second-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) demonstrate the importance of rules/laws in schools and communities;
- b) demonstrate knowledge of good citizenship within their school and communities;
- c) identify and explain symbols, traditions, people, and events that are honored within the United States.

**Proficient:** A second-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) demonstrate the importance of rules/laws in schools and communities;
- b) demonstrate knowledge of good citizenship within their school and communities;
- c) identify and explain symbols, traditions, people, and events that are honored within the United States.

**Basic:** A second-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The student will:

- a) demonstrate the importance of rules/laws in schools and communities;
- b) demonstrate knowledge of good citizenship within their school and communities;
- c) identify and explain symbols, traditions, people, and events that are honored within the United States.

**Below Basic:** A second-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

### GRADE 5

**Advanced:** A fifth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) demonstrate knowledge of citizenship rights and responsibilities across various communities, *including tribal communities*;
- b) describe the purpose and various levels of government in our lives;
- c) locate and apply information of historical events and issues from a variety of sources to effectively explain connections between past and present.

**Proficient:** A fifth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) demonstrate knowledge of citizenship rights and responsibilities across various communities, *including tribal communities*;
- b) describe the purpose and various levels of government in our lives;
- c) locate and apply information of historical events and issues from a variety of sources to effectively explain connections between past and present.

**Basic:** A fifth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The student will:

- a) demonstrate knowledge of citizenship rights and responsibilities across various communities, *including tribal communities*;
- b) describe the purpose and various levels of government in our lives;
- c) locate and apply information of historical events and issues from a variety of sources to effectively explain connections between past and present.

**Below Basic:** A fifth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

## Social Studies Content Standard 1 - Performance Level Descriptors (cont.)

### GRADE 8

**Advanced:** An eighth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) describe and compare the principles and structures of power, authority, and governance;
- b) demonstrate knowledge of citizenship, rights, and responsibilities across various communities, [including tribal communities](#);
- c) conduct research to draw unique parallels between historical and current events and issues.

**Proficient:** An eighth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) describe and compare the principles and structures of power, authority, and governance;
- b) demonstrate knowledge of citizenship, rights, and responsibilities across various communities, [including tribal communities](#);
- c) conduct research to draw unique parallels between historical and current events and issues.

**Basic:** An eighth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The student will:

- a) describe and compare the principles and structures of power, authority, and governance;
- b) demonstrate knowledge of citizenship, rights, and responsibilities across various communities, [including tribal communities](#);
- c) conduct research to draw unique parallels between historical and current events and issues.

**Below Basic:** An eighth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

### GRADE 12

**Advanced:** A twelfth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) analyze and critique the principles and structure of power, authority, and governance [at tribal, local, state, and national levels](#);
- b) demonstrate civic responsibility by participating as a citizen in the process;
- c) analyze historical and political developments and conducts research to thoroughly and effectively create and defend a position on an issue.

**Proficient:** A twelfth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) analyze and critique the principles and structure of power, authority, and governance [at tribal, local, state, and national levels](#);
- b) demonstrate civic responsibility by participating as a citizen in the process;
- c) analyze historical and political developments and conducts research to thoroughly and effectively create and defend a position on an issue.

- c) analyze historical and political developments and conducts research to thoroughly and effectively create and defend a position on an issue.

**Below Basic:** A twelfth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

## Social Studies Content Standard 2 - Culture and Cultural Diversity

Students demonstrate an understanding of the contributions and impacts of human interaction and cultural diversity on societies.

### Rationale

*Culture helps us to understand ourselves as both individuals and members of various groups. In a multicultural society, students need to understand multiple perspectives that derive from different cultural vantage points. As citizens, students need to know how institutions are maintained or changed and how they influence individuals, cultures, and societies. This understanding allows students to relate to peoples of local, tribal, state, national, and global communities.*

### Benchmarks

### Performance Level Descriptors

#### GRADE 2

**Advanced:** A second-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) name ways groups and cultures meet human needs;
- b) list ways people contribute to personal identity in daily life.

**Proficient:** A second-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) name ways groups and cultures meet human needs;
- b) list ways people contribute to personal identity in daily life.

**Basic:** A second-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The student will:

- a) name ways groups and cultures meet human needs;
- b) list ways people contribute to personal identity in daily life.

**Below Basic:** A second-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

#### GRADE 5

**Advanced:** A fifth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) identify and describe ways groups and cultures meet human needs;
- b) identify and describe ways people contribute to personal identity in daily life;
- c) identify and describe characteristics, contributions, and possible tensions ~~between~~ among cultural groups, including tribes.

**Proficient:** A fifth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) identify and describe ways groups and cultures meet human needs;
- b) identify and describe ways people contribute to personal identity in daily life;
- c) identify and describe characteristics, contributions, and possible tensions ~~between~~ among cultural groups, including tribes.

**Basic:** A fifth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The student will:

- a) identify and describe way groups and cultures meet human needs;
- b) identify and describe ways people contribute to personal identity in daily life;
- c) identify and describe characteristics, contributions, and possible tensions ~~between~~ among cultural groups, including tribes.

**Below Basic:** A fifth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

- a) compare and contrast the ways various groups meet human needs;
- b) evaluate and examine the transmission of cultural ideas;
- c) ~~compare and contrast a group's unique cultural characteristics and explain their contributions and possible tensions they may cause.~~ c) compare and contrast the unique cultural characteristics of groups, including tribes, and explain their contributions and possible tensions they may encounter.

**Below Basic:** An eighth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

### GRADE 12

**Advanced:** A twelfth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) analyze and evaluate the way various cultural groups, including tribes, meet human needs and contribute to or influence contemporary life;
- b) analyze human experience that integrates views of cultural expression;
- c) analyze the conflicts resulting from cultural assimilation and preservation.

**Proficient:** A twelfth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) analyze and evaluate the way various cultural groups meet, including tribes, human needs and contribute to or influence contemporary life;
- b) analyze human experience that integrates views of cultural expression;
- c) analyze the conflicts resulting from cultural assimilation and preservation.

**Basic:** A twelfth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The student will:

- a) analyze and evaluate the way various cultural groups, including tribes, meet human needs and contribute to or influence contemporary life;
- b) analyze human experience that integrates views of cultural expression;
- c) analyze the conflicts resulting from cultural assimilation and preservation.

**Below Basic:** A twelfth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

## Social Studies Content Standard 3 - Production, Distribution, and Consumption

Students describe the influence of economic factors on societies and make decisions based on economic principles.

### Rationale

*In a global economy marked by rapid technological, political, and economic change, students will examine how people organize for the production, distribution, and consumption of goods and services.*

## Social Studies Content Standard 4 - Time, Continuity, and Change

Students analyze events, people, problems, and ideas within their historical contexts.

### Rationale

Students need to understand their historical roots and how *past* events shape the ~~past~~, present, and *may shape the future*. Students must know what life was like in the past to comprehend how things change and develop over time. Students gain historical understanding through inquiry, ~~of history by~~ *and through* researching and interpreting events affecting individual, local, tribal, state, national, and global histories.

### Performance Level Descriptors

#### GRADE 2

**Advanced:** A second-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) identify different social groups and their interactions;
- b) identify how an event could change the future;
- c) identify tools and technology.

**Proficient:** A second-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) identify different social groups and their interactions;
- b) identify how an event could change the future;
- c) identify tools and technology.

**Basic:** A second-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) identify different social groups and their interactions;
- b) identify how an event could change the future;
- c) identify tools and technology.

**Below Basic:** A second-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

#### GRADE 5

**Advanced:** A fifth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) identify historical interactions and the impact of change;
- b) study current events and apply understanding of cause and effect;
- c) describe the evolution of tools and technology.

**Proficient:** A fifth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) identify historical interactions and the impact of change;
- b) study current events and apply understanding of cause and effect;
- c) describe the evolution of tools and technology.

**Basic:** A fifth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) identify historical interactions and the impact of change;
- b) study current events and apply understanding of cause and effect;
- c) describe the evolution of tools and technology.

**Below Basic:** A fifth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

#### GRADE 8

**Advanced:** An eighth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) describe events, people, problems, **conflicts**, and ideas within their historical contexts;
- b) analyze the way people react to current events and make connections between the past and present;
- c) describe the impact of tools and technology in different historical settings.

**Proficient:** An eighth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) describe events, people, problems, **conflicts**, and ideas within their historical contexts;
- b) analyze the way people react to current events and make connections between the past and present;
- c) describe the impact of tools and technology in different historical settings.

**Basic:** An eighth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) describe events, people, problems, **conflicts**, and ideas within their historical contexts;
- b) analyze the way people react to current events and make connections between the past and present;
- c) describe the impact of tools and technology in different historical settings.

**Below Basic:** An eighth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

#### GRADE 12

**Advanced:** A twelfth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) accurately examine events, people, problems, **conflicts**, and ideas within their historical contexts;
- b) make comparisons, describe cause and effect, and make connections between the past and current events;
- c) analyze the development and impact of tools and technology.

**Proficient:** A twelfth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) accurately examine events, people, problems, **conflicts**, and ideas within their historical contexts;
- b) make comparisons, describe cause and effect, and make connections between the past and current events;
- c) analyze the development and impact of tools and technology.

## Social Studies Content Standard 5 - People, Places, and Environments

Students apply their knowledge of the geographic themes (location, place, movement, region, and human/environment interactions) and skills to demonstrate an understanding of interrelationships among people, places, and environment.

### Rationale

*Students gain geographical perspectives of the community, state, nation, and world by studying the Earth and how humans interact with people, places, and environments. Their knowledge of geography allows students to make local and global connections. Students develop increasingly abstract thought as they use data and apply skills to analyze human behavior in relation to its physical and cultural environment.*

- c) evaluate how conflict, demographics, and movement impact global interdependence and human identification with place.

**Proficient:** A twelfth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) analyze and evaluate geographic data, historical and current events, the interaction of physical and human systems, and geographical patterns;
- b) use geographical or regional knowledge and analysis of environmental ~~modification(s)~~ **changes** to participate in both collaborative problem solving and informed decision making;
- c) evaluate how conflict, demographics, and movement impact global interdependence and human identification with place.

**Basic:** A twelfth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) analyze and evaluate geographic data, historical and current events, the interaction of physical and human systems, and geographical patterns;
- b) use geographical or regional knowledge and analysis of environmental ~~modification(s)~~ **changes** to participate in both collaborative problem solving and informed decision making;
- c) evaluate how conflict, demographics, and movement impact global interdependence and human identification with place.

**Below Basic:** A twelfth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

## Social Studies Content Standard 6 - Technology, Literacy, and Global Connections

Students use technology and literacy skills to access, synthesize, and evaluate information to communicate and apply social studies knowledge to global situations.

### Rationale

*Using a variety of resources, students will apply the inquiry process to locate, interpret, and evaluate multiple primary and secondary sources. Students will use this information to become critical thinkers and decision makers in a global community. Social Studies Content Standard 6 was written around the Framework for 21<sup>st</sup> Century Skills and the Common Core Literacy Standards for History and Social Studies.\**

## Performance Level Descriptors

### GRADE 2

**Advanced:** A second-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) identify an inquiry process to locate information;
- b) identify fiction and nonfiction sources.

**Proficient:** A second-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) identify an inquiry process to locate information;
- b) identify fiction and nonfiction sources.

**Basic:** A second-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) identify an inquiry process to locate information;
- b) identify fiction and nonfiction sources.

**Below Basic:** A second-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

### GRADE 5

**Advanced:** A fifth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) choose an appropriate inquiry process to locate information from a variety of sources;
- b) use digital tools to research, design, and present social studies concepts;
- c) explain the differences between primary and secondary sources.

**Proficient:** A fifth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) choose an appropriate inquiry process to locate information from a variety of sources;
- b) use digital tools to research, design, and present social studies concepts;
- c) explain the differences between primary and secondary sources.

**Basic:** A fifth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) choose an appropriate inquiry process to locate information from a variety of sources;
- b) use digital tools to research, design, and present social studies concepts;
- c) explain the differences between primary and secondary sources.

**Below Basic:** A fifth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

### GRADE 8

**Advanced:** An eighth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) evaluate multiple sources of information in diverse formats in order to address a question or solve a problem;
- b) use digital tools to research, design, and present social studies concepts;
- c) use accurate, sufficient, and relevant information from primary and secondary sources to support writing.

**Proficient:** An eighth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) evaluate multiple sources of information in diverse formats in order to address a question or solve a problem;
- b) use digital tools to research, design, and present social studies concepts;
- c) use accurate, sufficient, and relevant information from primary and secondary sources to support writing.

**Basic:** An eighth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) evaluate multiple sources of information in diverse formats in order to address a question or solve a problem;
- b) use digital tools to research, design, and present social studies concepts;
- c) use accurate, sufficient, and relevant information from primary and secondary sources to support writing.

**Below Basic:** An eighth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

### GRADE 12

**Advanced:** A twelfth-grade student meets expectations at the proficient level and *independently* demonstrates superior performance in the following. The student will:

- a) analyze or synthesize multiple sources of information in diverse formats in order to address a question or solve a problem;
- b) use digital tools to research, design, and present social studies concepts;
- c) analyze and critique primary and secondary sources to support writing.

**Proficient:** A twelfth-grade student at the proficient level *consistently* demonstrates performance in the following. The student will:

- a) analyze or synthesize multiple sources of information in diverse formats in order to address a question or solve a problem;
- b) use digital tools to research, design, and present social studies concepts;
- c) analyze and critique primary and secondary sources to support writing.

**Basic:** A twelfth-grade student at the basic level demonstrates *partial mastery* of knowledge and skills. The students will:

- a) analyze or synthesize multiple sources of information in diverse formats in order to address a question or solve a problem;
- b) use digital tools to research, design, and present social studies concepts;
- c) analyze and critique primary and secondary sources to support writing.

**Below Basic:** A twelfth-grade student at below basic is *unwilling or does not address* the expectations of the basic level.

## 2014 Wyoming Social Studies Content and Performance Standards

### Glossary

**Assimilation:** Assimilation is the absorption and integration of people, ideas, and/or culture into a wider society or group.

*Example:* Assimilation would include the melting pot theory as well as indigenous people being sent to boarding schools to acquire Western culture.

**Budget:** A budget is a spending and saving plan based on expected income and expenses.

An orderly program for spending, saving, and investing the money earned to achieve desired goals; also called a financial plan or spending plan.

*Example:* Budgets can include the federal budget, state budget, or personal budget.

**Cause and Effect:** Cause and effect is a way of describing what happens and why. The cause is the reason that the effect took place. The effect is the event that took place as a result of the cause.

*Example:* The invention of the automobile led to drive through restaurants.

**Civic Responsibility (Good Citizenship):** Civic responsibility is comprised of actions and attitudes associated with democratic governance and social participation.

*Example:* Civic responsibility can include participation in government, church, volunteers and memberships of voluntary associations. Actions of good citizenship can be displayed in advocacy for various causes include political, economic, civil, environmental, or quality of life issues. It is also reflected in a general willingness to sacrifice personal desires for the common good.

**Collaboration:** Collaboration is the working of one with another; cooperating on a common product.

*Example:* Collaboration in government would be bi-partisanship or the United Nations.

**Command Economy:** Command Economy is an economic system in which a central authority is in command of the economy; a centrally planned economy.

*Example:* Although most economies today are market-based mixed economies (which are partially planned), fully command economies of the Soviet-type continue to exist in Cuba, North Korea and Laos.

**Community:** Community is a group of people with a common characteristic or interest living together within a larger society.

*Example:* Chinatown, Little Italy, communes, reservations, neighborhoods, schools, and classrooms are all communities.

**Consumption:** In economics, consumption is the final using up of goods and services. The term excludes the use of intermediate products in the production of other goods (e.g., , the purchase of buildings and machinery by a business). Economists use statistical information on income and purchases to trace trends in consumption, seeking to map consumer demand for goods and services.

*Example:* The consumption of renewable energy has increased steadily. Renewable energy currently accounts for about 8.20% of the United States energy consumption. Most of that comes from biomass and hydroelectric sources.

**Continuity and Change:** In studying the past we can see that some things remain continuous or steady, while other things change. Thinking about continuity and change requires us to compare different points in time-either two points in time from the past or one point from the past with one from the present. Sometimes what changes and what stays the same are surprising or obscure. Sometimes change brings progress, other time decline.

*Example:* The advent of electricity and household technology brought major changes to family life in the United States, but there were continuities as well. Doing laundry was much easier and less physically strenuous with washing machines, but laundry remained a household task that was almost always done by women and the amount of clothing that most people owned increase, so the time taken to do laundry did not decrease significantly.

**Cultural Diversity:** Cultural diversity is the cultural variety and cultural differences that exist in the world, a society, or an institution. Cultural diversity is based on the idea that cultural identities should not be discarded or ignored, but rather maintained and valued. The foundation of this belief is that every culture and race has made a substantial contribution to American history.

*Example:* Dying languages and urbanization are threats to cultural diversity.

**Cultural Groups:** These groups are socially defined categories based on common culture or nationality. Culture can, but does not have to, include common ancestry, appearance, cuisine, dressing style, heritage, history, language or dialect, religion, symbols, traditions, or other cultural factor.

*Example:* Cultural Groups are referenced when people speak of Italian, Samoan, or Japanese culture. They are referring to the shared language, traditions, and beliefs that set each of these peoples apart from others. In most cases, those who share your culture do so because they acquired it as they were raised by parents and other family members who have it.

**Cultural Preservation:** To preserve culture is to maintain the beliefs values, customs, and norms of a group of people.

*Example:* Means of cultural preservation would include teaching languages spoken at home, creating museums, and collecting oral histories.

**Culture:** Culture is evidence of a human institution and is manifested in the learned behavior of people, which includes their belief systems, languages, social relations, technologies, institutions and organizations, and their development and use of material goods.

*Example:* There are many features of a people's culture like language, religion, traditions, clothing, or food used or consumed by a group of people.

**Current Event:** Current events are news items: important political and social events or issues of the present time.

*Example:* Current events can be found in places like the newspaper which includes news, events, highlights, and feature stories from around the world that are significant to students' lives.

**Democratic Society (Democracy):** A democratic society is one in which the people have ultimate political authority.

*Example:* A democratic society contrasts with other societies where power is either held by one, as in a monarchy, or where power is held by a small number of individuals, as in an oligarchy.

**Demographics:** The statistical study of human populations especially with reference to size and density, distribution, and vital statistics.

*Example:* Demographics include statistical data like distribution of wealth and population. When moving to a new city or visiting a new area it is helpful to look at demographics to learn about the people who live in that area.

**Distribution:** Distribution is the process of making a product or service available for use or consumption by a consumer or business user, using direct or indirect means (such as a third party go between).

*Example:* Product distribution gives you a way to get your product to the consumer. There are many methods you can use to distribute your product. When choosing the most cost-effective distribution method, be sure to consider costs associated with direct selling, as well as any retailer, wholesaler or broker fees, commissions, and shipping.

**Economic Principle:** Economic Principle is the interrelated economic factors that explain what may cause what, or what may happen under certain circumstances in economics.

*Example:* Scarcity, opportunity cost, and efficiency are all considered factors of how the economy works (or should work), hence, they refer to economic factors.

**Environment:** Environment is defined as all the external factors influencing the life and activities of people, plants, and animals. Environment is the social and cultural forces that shape the life of a person or a population.

*Example:* Your surroundings, classroom, town, community, or neighborhood are all environments.

**Environmental Modification:** Environment modifications are any changes made to the environment.

*Example:* Environment modifications are usually made for the purposes of farming. The use of pesticides to grow crops and the effects it has on the soil and environment would be an environmental modification.

**Geographical Patterns:** Geographical patterns are the spatial distributions explainable as a repetitive distribution.

*Example:* Sand dunes, the Interstate Highway System, the Great Migration, settlements by water, and westward expansion are all geographical patterns.

**Global Interconnectedness/Interdependence:** Global interconnectedness is a state of being connected reciprocally.

*Example:* As China is dependent on US consumers to purchase its goods and the US debt to China steadily increases, the two superpowers demonstrate global interconnectedness.

**Globalization:** Globalization is the development of an increasingly integrated global economy marked especially by free trade, free flow of capital, and the tapping of cheaper foreign labor markets.

*Example:* NAFTA, McDonalds in other countries, social media, outsourcing of jobs, or OPEC

**Government:** Government is the important political institutions and the customs, laws, and rules that are used to interact with each other and to govern society.

*Example:* The government of the United States of America is the federal government of the constitutional republic of fifty states, as well as one capital district, and several other territories. The federal government is composed of three distinct branches: legislative, executive and judicial.

**Human Characteristics:** Human characteristics are the human-designed cultural features of a place (land use, architecture, forms of livelihood, religion, food, transportation, and communication networks).

*Example:* The human characteristics of Wyoming include cell phone towers, cowboy hats, roads, the Oregon and Mormon Trails, farms, and ranches.

**Human/Environment Interaction:** Human/Environment Interaction considers how humans adapt to and modify the environment. Humans shape the landscape through their interaction with the land; this has both positive and negative effects on the environment.

*Example:* Some examples of human/environment interaction are pollution, recycling, planting trees, factories, way of dress, synthetic vs. organic, pest control, and weather patterns.

**Indigenous Tribes of Wyoming:** The term is inclusive of those groups who:

- Identify as indigenous, Native American, or American Indian under the regulations established by a tribe
- Maintain historical continuity with pre-colonial and/or pre-settler societies
- Maintain a strong link to territories and surrounding natural resources
- Maintain distinct social, economic, or political systems
- Maintain distinct language, culture, and beliefs
- Resolve to maintain their ancestral environments and systems as distinctive peoples and communities (e.g., Northern Arapaho, Eastern Shoshone, Northern Cheyenne, Crow, Ute, Lakota, etc.)

Adapted from the United Nations Permanent Forum on Indigenous Issues - [link to the full version from which this definition was adapted](#)

**Location:** Location can be absolute or relative. Absolute location provides a definite reference to locate a place. The reference can be latitude and longitude, a street address, or even the Township and Range system. Relative location describes a place with respect to its environment and its connection to other places, or what surrounds a place.

*Example:* We are north of or south of a relative location. Also, a more specific example would be that the Wyoming capital city of Cheyenne is located at 41.145548N, 104.802042W.

**Macroeconomics:** Macroeconomics is the study of the economy as a whole, including topics such as inflation, unemployment, and economic growth.

*Example:* Macroeconomics includes the global economy, e-commerce, and international trade.

**Market Economy:** A market economy is an economy that relies chiefly on market forces to allocate goods and resources and to determine prices.

*Example:* The term market economy used by itself can be somewhat misleading. For example, the United States constitutes a mixed economy (substantial market regulation, agricultural subsidies, extensive government-funded research and development, Medicare/Medicaid), yet at the same time it is foundationally rooted in a market economy. Different perspectives exist as to how strong a role the government should have in both guiding the market economy and addressing the inequalities the market produces.

**Mental Map:** Mental maps are maps we have in our minds of places we have experienced. They are a personal point-of-view perception. They include perceptual images in our mind that provide us with an awareness of the location of places and relationships between direction, distance, size and characteristics of a place.

*Example:* Simple sketches of maps created from memory of an urban area used to reveal five elements of the city: nodes, edges, districts, paths, and landmarks.

**Microeconomics:** Microeconomics is the study of the economic behavior and decision making of small units, such as individuals, families, and businesses.

*Example:* Microeconomics includes personal and business finances.

**Migration:** Migration is passing from one region or climate to another.

*Example:* Westward migration, immigration, and the Silk Road are all examples of migration.

**Mixed Economy:** A mixed economy is an economy in which private enterprise exists in combination with a considerable amount of government regulation and promotion

*Example:* A mixed economy combines elements of the command and market economies. The definition of mixed economy remains somewhat subjective. The world's developed nations are the most common examples of mixed economies. The United States, Canada, Australia, Japan, Germany, the United Kingdom, and Italy are all examples of mixed economies. Examples in the developing world include Mexico, Slovenia, and South Africa.

**Movement:** Movement includes natural and human phenomena change on Earth's surface over time. Humans move, a lot! In addition, ideas, fads, goods, resources, and communication all travel distances. This theme studies movement and migration across the planet.

*Example:* Natural phenomena such as ocean currents and air masses move across Earth's surface on a continuing basis. Humans interact on Earth from travelling from place to place, communicating across long distances and transporting goods by land, water, and air.

**Multicultural:** Multicultural societies are ethnically and/or racially diverse.

*Example:* The United States is a multicultural society since it includes people from many different ethnic groups.

**Nation:** A territorial division containing a body of people of one or more nationalities and usually characterized by relatively large size and independent states.

*Example:* A national identity might be American, Arapaho, Shoshone, or German.

**Physical Characteristics:** Physical characteristics describe the natural environment of the place.

*Example:* The Rocky Mountains, Ayers Natural Bridge, the Grand Canyon, Sinks Canyon, and Devils Tower are all examples of locations with unique physical characteristics.

**Place:** Place describes the human and physical characteristics of a location.

*Example:* Physical characteristics include a description such things as the mountains, rivers, beaches, topography, and animal and plant life of a place. Human characteristics include the human-designed cultural features of a place (land use, architecture, forms of livelihood, religion, food, transportation, and communication networks).

**Political Process:** Political process is the process followed to resolve important issues that concern a large number of people.

*Example:* Political process refers to those legal activities where citizens are capable of a change in public policy.

**Political System:** A political system is a system of politics and government. It is usually compared to the legal system, economic system, cultural system, and/or other social systems.

*Example:* A country's political system includes who should have authority, how religious questions should be handled, and what the government's influence on its people and economy should be.

**Population Distribution:** Population distribution is the arrangement or spread of people living in a given area; also, how the population of an area is arranged according to variables such as age, race, or sex.

*Example:* An examples of locations with variances in population distribution would be urban vs. rural.

**Primary Source:** If you are seeking to learn about the past, primary sources of information are those that provide first-hand accounts of the events, practices, or conditions you are researching. In general, these are documents that were created by the witnesses or first recorders of these events at about the time they occurred, and include diaries, letters, reports, photographs, creative works, financial records, memos, and newspaper articles (to name just a few types).

*Examples of primary sources include:*

- Diary of Anne Frank - Experiences of a Jewish family during WWII
- The Constitution of Canada - Canadian History
- A journal article reporting NEW research or findings
- Native American beadwork and treaties - Native American history
- Plato's Republic - Women in Ancient Greece

**Production:** Production is the act of creating output, a good or service which has value and contributes to the utility of individuals. The act may or may not include factors of production other than labor. The function of production, to some extent, is to try to meet the unlimited wants of consumers.

*Example:* In a democratic society, production is determined by individuals. People choose the goods and services they consume and produce, although advertising and consumer demand influence both. The concept of exchange of money is related to economic production: consumers use money to purchase goods and services.

**Reasoned Judgment:** Reasoned judgment is a decision that requires time and effort and results from careful information gathering, generation of alternatives, and evaluation of alternatives.

*Example:* Reasoned judgment is reached once a student has taken the time to research a topic and come to a belief based on evidence.

**Region:** Regions divide the world into manageable units for geographic study. Regions have some sort of characteristic that unifies the area. Regions can be formal, functional, or vernacular.

*Example:* Formal regions are those that are designated by official boundaries, such as cities, states, counties, and countries. For the most part, they are clearly indicated and publicly known. Functional regions are defined by their connections. For example, the circulation area for a major city area is the functional region of that paper. Vernacular regions are perceived regions, such as "The South," "The Midwest," or the "Middle East;" they have no formal boundaries but are understood in our mental maps of the world.

**Regionalization:** Regionalization is to divide into regions or administrative districts: arrange regionally.

*Example:* Regionalization has occurred in the United States as Republicans and Democrats migrate to common communities and create polarized states.

**Scarcity:** Scarcity is the economic situation where needs or wants exceeds means. Therefore, people have to make choices.

*Example:* Scarcity impacts natural resources like uranium and fresh water.

**Secondary Source:** In contrast to a primary source, a secondary source of information is one that was created *later* by someone who *did not* experience first-hand or participate in the events or conditions you're researching. For the purposes of a historical research project, secondary sources are generally scholarly books and articles. Also included would be reference sources like encyclopedias.

*Example:*

Examples of secondary sources include:

- A journal/magazine article which interprets or reviews previous findings
- A history textbook
- A book about the effects of WWI

**Tribe:** A tribe is a social division in a traditional society consisting of families or communities linked by social, economic, religious, or blood ties, with a common culture and dialect, typically having a recognized leader.

*Example:* In contemporary contexts, it is problematic when used to refer to a community living within a traditional society. It is strongly associated with past attitudes of white colonists toward so-called primitive or uncivilized peoples living in remote undeveloped places. For this reason it is generally preferable to use alternative terms such as community or people (Eastern Shoshone, Northern Arapaho).

# 2014 Wyoming Social Studies Content and Performance Standards

## Historical Background

The Wyoming Social Studies Content and Performance Standards represent a cooperative effort. In 1998-1999, representatives from each of the districts participated in regional groups along with community college, University, and business representatives. The process began with regional meetings where the participants compiled drafts using local district standards. The state committee, consisting of regional representatives, utilized the regional documents to draft the state standards. National standards and several states' standards were referenced to establish the rigor of the Wyoming Social Studies Content and Performance Standards. These documents are listed below:

- National Council for the Social Studies, Curriculum Standards for Social Studies - ISBN 0-87986-065-0.
- National Center for History in the Schools, National Standards for History - ISBN 0-9633218-4-6.
- Center for Civic Education - National Standards For Civics And Government, ISBN 0-89818-155-0.
- Alaska, Content Standards for Alaska Students.
- Arkansas, Social Studies Curriculum Framework
- California, The Challenge Initiative, History and Social Science Standards, California State Department of Education.
- Colorado Model Geography Standards
- Florida, Sunshine State Standards
- Indiana, The Social Studies Proficiency Guide, Indiana Department of Education.
- Massachusetts, History & Social Science Curriculum Framework.
- New York, Social Studies Resources Guide.
- Texas, TEKS for Social Studies, Texas Education Agency.
- Virginia, History & Social Studies Standards of Learning.

In 2002-2003, writing committees were convened to review and revise these standards.

In 2008, consistent with its responsibility to evaluate and review the uniformity and quality of the standards at least every five years, the Wyoming State Board of Education Board directed the Wyoming Department of Education (WDE), working in consultation and coordination with local school districts, to formulate and implement a process to evaluate and review the uniformity and quality of the standards by November, 2008.

In order to accomplish the goal of reviewing the standards, a steering committee was convened to guide the review process. It met in early 2008 to develop the process to be used by Content Review Committees in each content area with representation from as many Wyoming school districts as possible. Members of the Standards Review Steering Committee nominated eight to twelve expert educators in each of the ten content areas represented in the Standards. These

committees were balanced geographically and represented preschool, elementary, secondary, special education, and higher education teachers.

The reviewers who agreed to serve on a committee met in spring, 2008 to participate in a systematic evaluation of the uniformity and quality of the standards in their content area. Among the aspects of the Standards reviewed were:

- a) the cognitive complexity of the standards.
- b) the degree of integration of the Common Core of Skills, 21<sup>st</sup> Century Skills, and technology in the standards.
- c) how Wyoming Standards compare to national curriculum standards and other states' standards.
- d) how the format of standards documents might be improved to make them more uniform, more understandable, and more useful.
- e) how urgent the need for substantive revision of the standards is in each content area.

The 2008 standards reflect formatting rather than substantive changes. Substantive revisions to standards in all content areas will be recommended based on conclusions from the 2008 standards review and continuing work by content review committees and other stakeholder groups between 2008 and 2013.

In the summer of 2012, a standards review committee was convened to review the Wyoming Social Studies Content and Performance Standards. Subcommittees were formed and it was decided that an additional social studies standard would be added addressing the Framework for 21st Century Skills for technology integration and a connection to literacy through the Common Core State Standards for Literacy in History/Social Studies, Science, & Technical Subjects. It was also decided that an additional grade band division would be added to better meet the demand for increased rigor at all grade levels and prepare students by introducing social studies concepts at the earliest grade levels. The committee recognizes that regardless of the variations of course sequences throughout the state, the knowledge and skills identified upon graduation are intended for all students.
