# Why New ID System?

- Fusion is over ten years old and built on a version of SharePoint that will in the near future no longer be supported.
- Approached by the LMS SIG group to use the WISER ID to manage user identity.
- Needed a matching algorithm that weighted former last names so student IDs could remain with a person into adulthood.

# How Are IDs Retrieved

- There are Two Ways to Retrieve Student IDs
  - Student Locator
  - Batch Upload

# ID System Role

- Currently there is only one user role for the new system
- It is a district level role.
